

## Work Experience

### Frontend Engineer

Record Management System team

Mark43

Remote

Jul 2021–Mar 2024

- Updated the web application to meet all requirements requested by Massachusetts Registry of Motor Vehicles and Boston PD, which raised the ARR with the client.
- Resolved multiple critical bugs in production during on-call shifts.
- Led the application refactoring project to increase test coverage and set up strict type safety resulting in customer satisfaction and less bugs.
- Worked on a number of projects across teams.

### Software Engineer

SWE team

Scentroid

Stouffville, CA

Jun 2019–Jul 2021

- Responsible for maintenance and improvement of the Drone Information Management System.
- Collaborated and worked in tandem with the Android and backend teams to ensure the best possible result.
- Developed the tools to visualize and analyze air pollution data collected by air-scanning drones.
- Enhanced analysis tools to meet the requirements for the new client to identify the source and the severity of air pollution, securing the new client for the company.
